3. Admin sign-in and the sheet menu
4. Admin tab: users and mapping
5. Approvals tab and Activity Report
6. Approvals
7. Dashboard
8. Location tab: team locations
9. Troubleshooting

1. About the app

Image DSR (Daily Sales Reporting) is Image Marketing's mobile app for recording daily sales. It shows Target, Achievement, comparison with the same period last year (L2L) and Growth in real time.

This manual is for the **Admin** role. In the app you can:

- Create and edit users (individually or from Excel)
- Create and edit mapping (individually or from Excel)
- View and approve every request
- Make any mapping change without approval
- Activity Report, Dashboard and locations

> **Note:** Everyone uses the same link: **https://imagefashionforever.github.io/image-dsr/**. After you sign in, the app automatically shows the screens for your role.

2. Installing the app (one time only)

Android phone (Chrome)

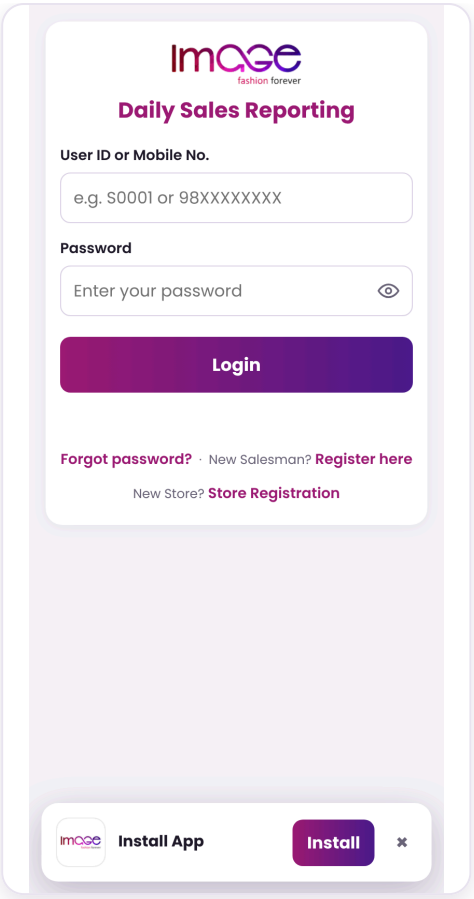

1. Tap the link you received on WhatsApp. If it opens inside WhatsApp, tap ⋮ at the top and choose **Open in Chrome**.
2. Two to three seconds after the app opens, an **Install App** bar appears at the bottom. Tap **Install**.
3. When Chrome asks for confirmation, tap **Install** again. The **Image DSR** icon is added to your home screen.
4. From now on, open the app from this icon.

> **Important:** Installing from the Samsung Internet browser may show "Unsafe app blocked". This is not a security risk, but we recommend opening the link in **Chrome** instead.

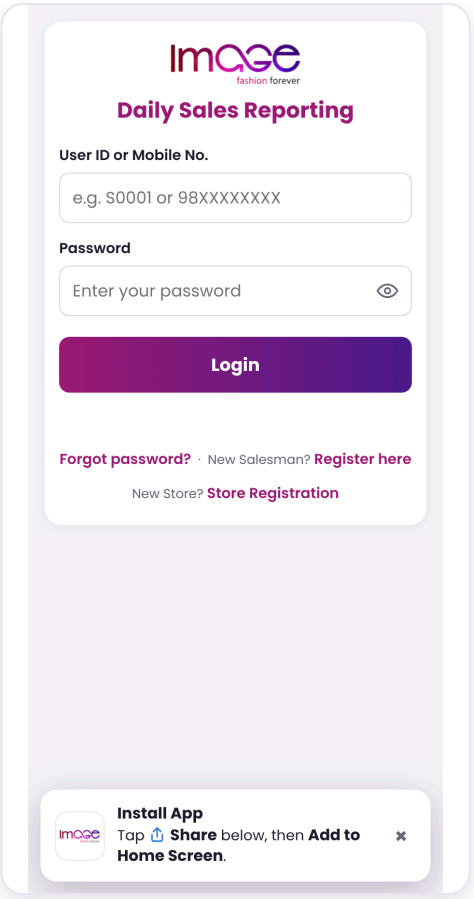

> **Tip:** If the bar does not appear, open the Chrome ⋮ menu and tap **Install app / Add to Home screen**. Apps cannot be installed from an Incognito tab.

iPhone (Safari)

1. Open the link in **Safari**.
2. Tap the **Share** button at the bottom (a square with an upward arrow).
3. Tap **Add to Home Screen**, then **Add**.

Android: the "Install App" bar

iPhone: Share → Add to Home Screen

3. Admin sign-in and the sheet menu

- Sign in with User ID **ADMIN** (or the Admin mobile number) and the Admin password. This account does not appear in the Users sheet.
- After the first sign-in, change the password from the profile menu → **Change Password**. The new password is not visible in the sheet or the code.
- The Admin sees every request, can approve or reject all of them, and Team Mapping changes made by the Admin apply immediately.

The "DSR Admin" menu in Google Sheets

1. Open the Google Sheet. The **DSR Admin** menu is at the top, next to Logic ERP.
2. Choose **Go to Requests tab** and select the rows of the requests to process.
3. Choose **Approve selected requests** or **Reject selected requests**. This does exactly what the app does (Mapping, Users, Status, Action By).

> **Important:** Typing "Approved" in the Status column does not update the Mapping. Always approve through the app or the DSR Admin menu.

Deploying a new version in Apps Script

1. Paste the new code into Code.gs / Index.html (Ctrl+A → paste → Save).

2. Go to **Deploy** → **Manage deployments** → ✏️ → **Version: New version** → **Deploy**. Do not create a "New deployment", as that changes the link.
3. If a new tab or column was added, run **setup()** once.

4. Admin tab: users and mapping

The Admin tab is visible only to the Admin. Use the **Users / Mapping** switch at the top. All changes apply immediately without approval and are recorded in the Activity Report.

Users

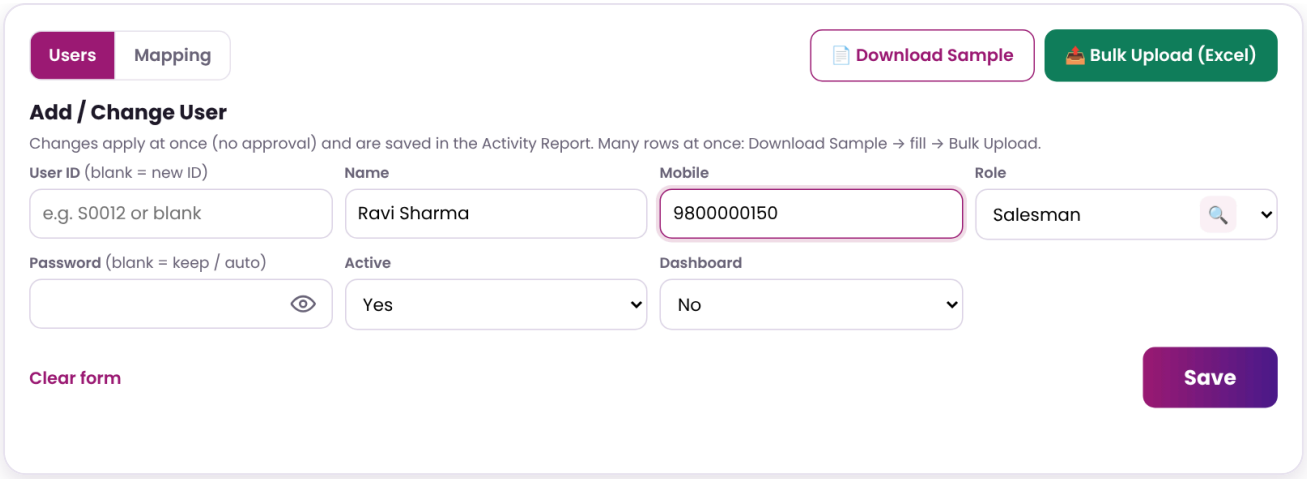

- Leave **User ID** blank to create a new ID based on the role (S0012, ST0005, TL06 and so on).
- Enter an existing ID, or tap **Edit** in the list, to load that user's details into the form.
- Role, Mobile, Active, Dashboard and Password. If the password is left blank, a 6-digit first password is generated and shown after saving.

Mapping

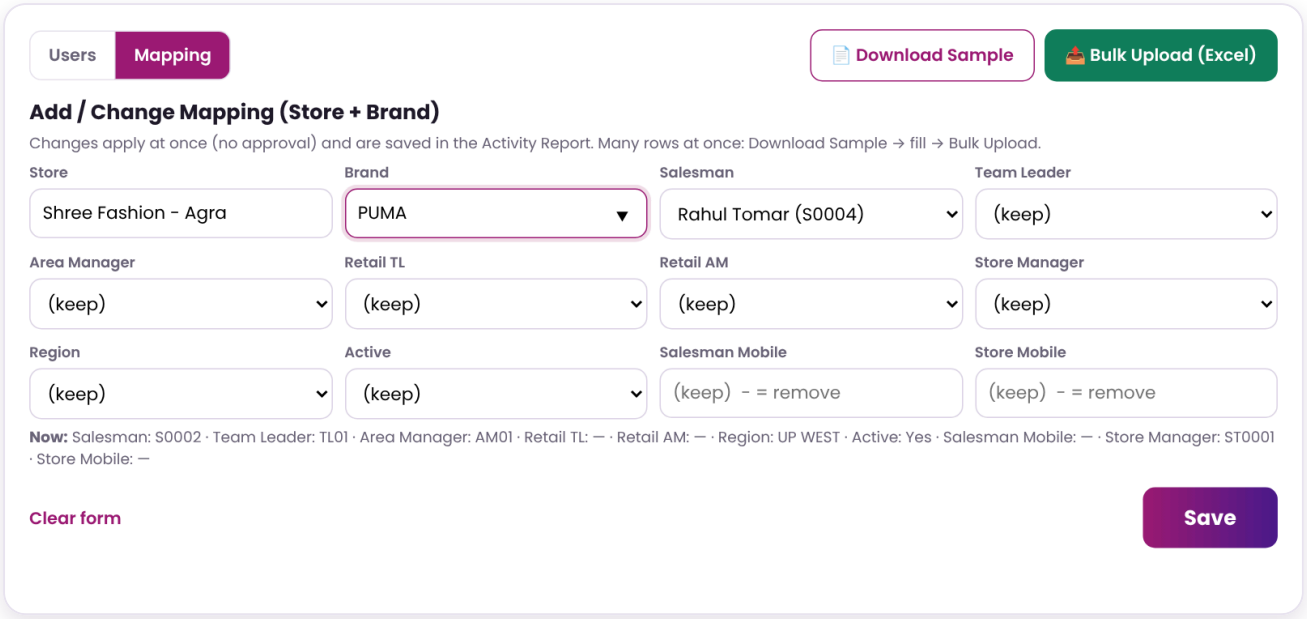

- Enter the Store and Brand. The form shows who is currently assigned, or **New row**.
- Salesman, TL, AM, Retail TL, Retail AM and Store Manager are chosen from drop-downs: **(keep)** keeps the current value, **(remove)** clears it.
- Region, Active, Salesman Mobile and Store Mobile.

Bulk Upload (Excel)

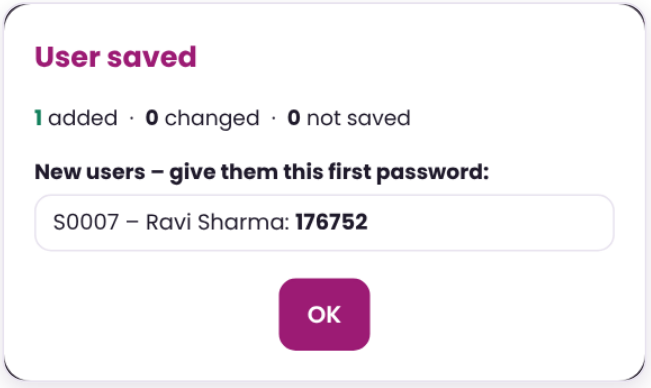

1. Tap **Download Sample** to get an Excel file with the headings and a "How to fill" sheet.
2. Fill in the rows. A blank cell keeps the existing value; **-** clears it.
3. Tap **Bulk Upload (Excel)** and choose the file (up to 2,000 rows).
4. A summary shows rows added, changed and not saved (with reasons), plus first passwords for new users.

Users form

Mapping form

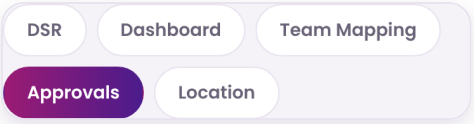

After saving: first password for a new user

5. Approvals tab and Activity Report

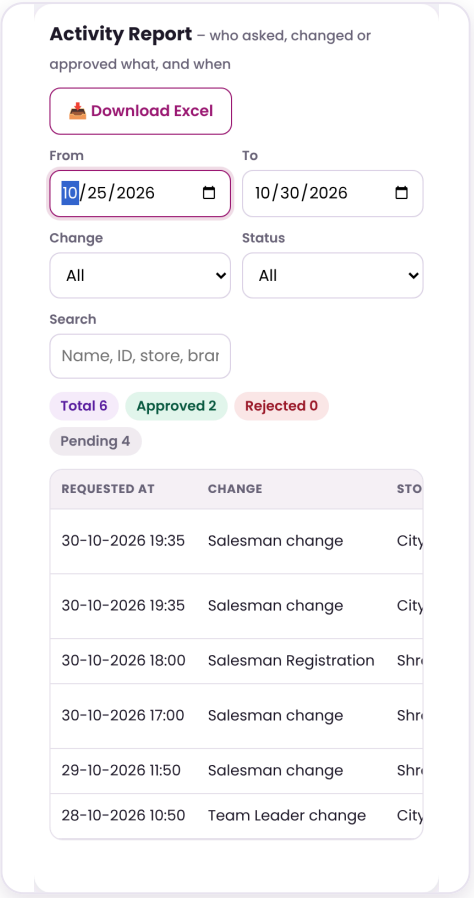

The CEO, MD and Admin have a separate **Approvals** tab, which shows the number of pending requests.

- Top: requests awaiting your approval. Tick them and use **Approve Selected / Reject Selected**.
- Below: the **Activity Report**, showing who requested, changed or approved what, and when, across the company.
- Filters: From / To, type of change, Status (Pending / Approved / Rejected) and Search.
- Each pending request shows whose approval it is waiting for.
- **Download Excel**: export the report.

> **Note:** Your changes take effect immediately. Only a Sales Head Mapping made by the CEO requires the MD's approval.

Tabs

Activity Report

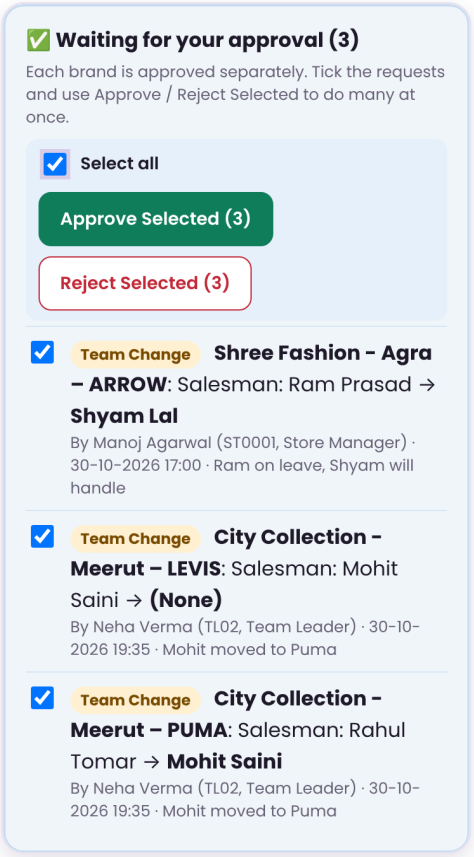

6. Approvals

You receive the following requests:

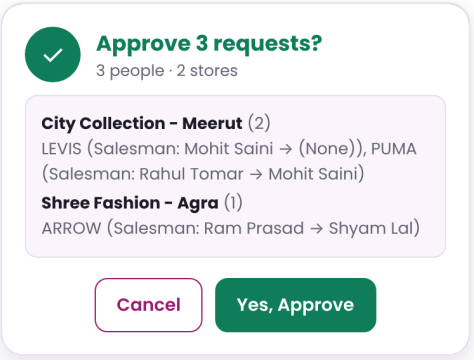

- Every request, at any level

1. Requests appear in the **Waiting for your approval** box at the top.
2. Tick the requests to approve, or tap **Select all**. You can narrow the list with 🔍 search first; Select all ticks only the rows shown.
3. Tap **Approve Selected** or **Reject Selected**.
4. Check the store-wise list in the confirmation window, then tap **Yes, Approve** or **Yes, Reject** (you can add a reason when rejecting).

> **Note:** Each request goes to the next two levels above. If a level is vacant, the request moves up to the next level. A rejected request can be approved later from Team Mapping → Change Requests using **Approve now**.

Approving several requests

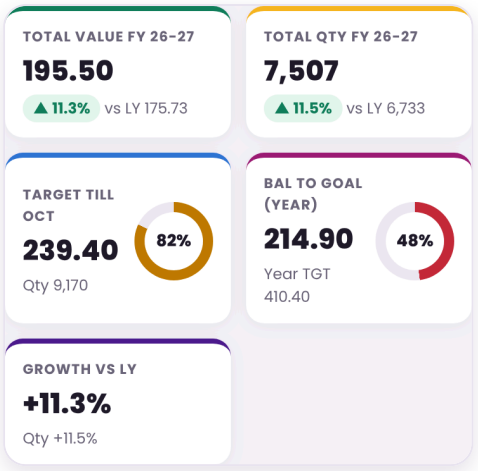

Confirmation

7. Dashboard

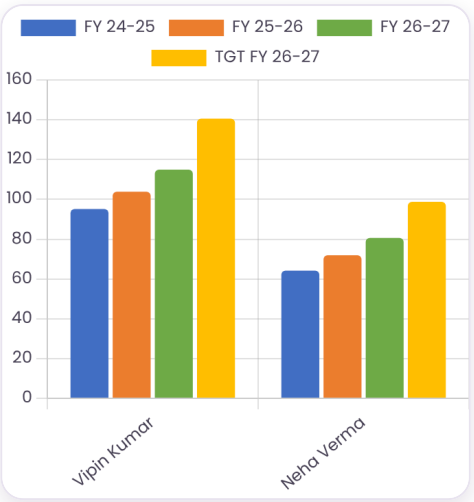

The Dashboard is visible only when **Dashboard = Yes** is set against your name in the Users sheet (always visible to the CEO and MD).

Section	What it shows
Filters	Month, **Year till Month / Month**, Region, AM, TL, Own / Other Store, Store, Brand, Salesman, value unit (₹ Lakh / Crore)
Summary cards	Total Value and Total Qty (with % change vs last year), Target, Balance to Goal, Growth
Bar chart	Three years plus Target, grouped by TL / AM / Store / Brand and more. Tap a bar to drill down
Brands Contribution	Share of each brand (%)
Monthly Trend	This financial year by month, compared with the previous two years and the target
Top / Bottom 10	Best and weakest performers this year, and last year's top 10

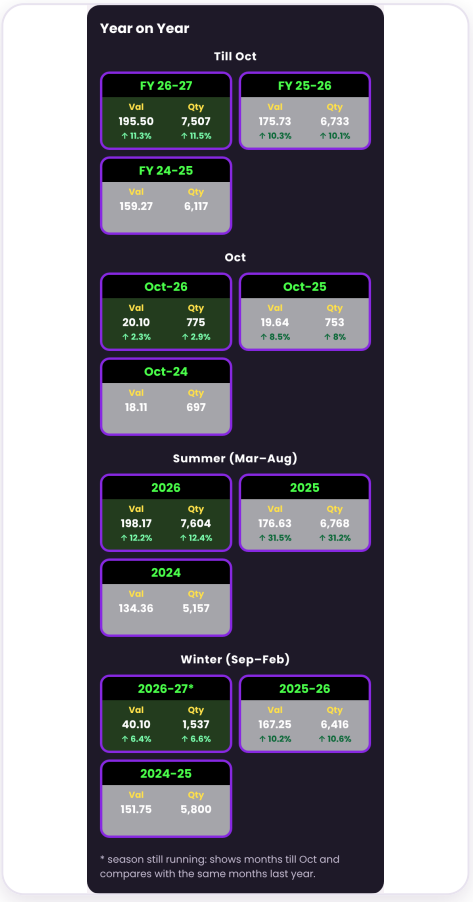

Section	What it shows
Season	Summer (Mar–Aug) and Winter (Sep–Feb) comparison
Year on Year	Year to date, month, Summer and Winter cards for three years

Summary cards

Bar chart

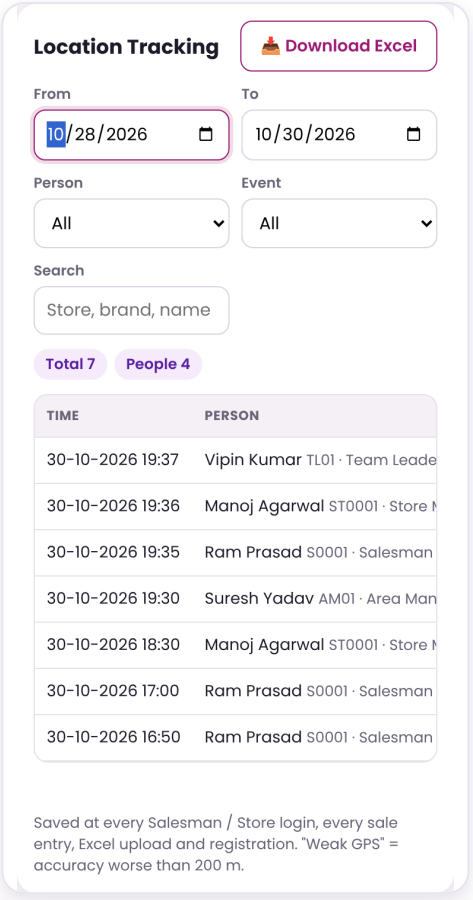

Year on Year

8. Location tab: team locations

The location of each team sign-in (Salesman / Store Manager), sale entry, Excel upload and registration is recorded here.

- Filter by **From / To** date, **Person** and **Event** (Login, Sale Entry, Excel Upload, Registration).
- Tap 📍 **Open** on any row to see the place on Google Maps.
- **weak GPS** means the location is accurate to more than 200 metres only.
- **Download Excel**: export the full list.

> **Note:** Locations are captured only at these moments; this is not continuous live tracking.

Location tracking

9. Troubleshooting

Problem	What to do
"Wrong User ID or password"	Check your User ID / mobile number and password. After 5 failed attempts, wait 15 minutes.
"Location is required" / permission blocked	Turn on phone Location. Tap 🔒 next to the web address → Permissions → Location → Allow.
"Waiting for approval"	Your registration, or at least one brand, has not been approved yet. Contact your manager.
"Sorry, unable to open the file" (Chrome)	Always use the github.io link or the home-screen icon, not the direct Google link.
"Session expired"	Sign in again or enter your MPIN (happens after 15 minutes of inactivity or at midnight).

Problem	What to do
"Server is busy"	Wait a few seconds and try again. The app also retries automatically up to three times.
